## 📄 PROFILE

I'm Asmit Shrestha, a motivated individual with a strong background in Information Technology and Management. I hold a Bachelor's degree in Computer Information System from Pokhara College of Management, where I was a two-time university topper. I've used my skills in math and logic for web development, database management, and IT support.

I've worked as an Academic Head and instructor, designing and teaching test prep courses like IELTS, PTE, and SAT. I've also tutored students in math, programming, and computer science. These roles helped me build strong communication and mentoring skills.

I enjoy teaching, especially helping students grow more confident in math and STEM. I'm looking to join a team that values learning and wants to support students in their academic journey.
